About the Challenge:
Create a blog page from the design provided.
Create a simple form to submit blog content and display it on the front end.

Requirements:
1. Make it responsive (breakpoints: 400px and 1240px).
2. Form should have validations.
3. Use **React** to code.

Submission:
1. Create a public GitHub repo with your code (including a GitHub Pages branch - optional) to host your app.
2. Kindly provide instructions to open/view the project (if needed)

Evaluation:
1. Code quality, brevity, readability, maintainability, and coding standards.
2. (Development) Time taken.
3. UI quality.
